

I am interested in providing internship opportunities. I own the local Spoiled Rotten Photography business which specializes in preschool photography. I am excited to offer what I think would be a great paid opportunity for students to work with children.

I think the intern model works best for this position, because it is part-time and seasonal. Although the work involves photography, the student doesn't necessarily have to study photography. The most important aspect of the job is the love of working with and instructing children. We like to have fun while we work! I'm actively filling positions now for this fall season.
