About the role

Concept Plus is seeking an Oracle DBA to provide technical support to a federal clients' systems. The primary focus is daily sustainment for a Web/Oracle system architecture in AWS.

What you'll do

- Maintaining the database and configuration on each database server and/or Cloud One, or any other hosting area, the Government deems fit
- Maintaining system configuration if third party software is utilized on the hosting environments · Updating and tracking Time Compliance Network Orders (TCNOs) and if applicable, NOTAMS related to database support
- Coordinating firewall access to maintain mainframe/server accessibility for users and interfaces
- Coordinating release schedules with the PMO and interfacing partners
- Installing new maintenance releases of client applications
- Resolving system anomalies
- Developing database strategies, system monitoring, and improvements to database performance and capacity, and plan for future requirements
- Complying with DISA Security Technical Implementation Guides (STIGs)
- Preparing software release packages to migrate to newer versions of COTS (hardware or software)
- Modifying the database structure based on approved software changes
- Maintaining, updating, and ensuring the schema. Processes, and subprocesses that are required for reports from the Propulsion Actuarial Client Server are available and useable by the Propulsion community 100% of the time to ensure all data analysis, forecasting, and other requirements can be always fulfilled
- Facilitating backps; ensure data is accurate and complete if restored from a backup; and assist with the backup restoration

- Preparing databases to be used in testing to include but not limited to Component Validation and Integration (CV&I), Qualification Test and Evaluation (QT&E), performance testing, user-acceptance testing, and regression testing
- Support customer with audit compliance reviews with task like data-calls and PBC responses
- Develop Infrastructure as Code(IaC) scripts for database related solutions

Required Qualifications

- US Citizen with active Secret Clearance
- BA/BS preferrable, can be replaced by additional experience
- 3 years of DBA experience (Oracle) and Infrastructure software development
- 1+ years Database management in an AWS Cloud environment (RDS)
- 3+ years of experience with Oracle PL/SQL
- Experience with Oracle database replication
- Security+ CE or CCNA Security certification required
- Knowledge of AWS and/or OCI related technologies and utilities

Preferred Qualifications

- Oracle Certified Professional for 11g or above
- Strong interpersonal and communications skills.
- AGILE Environment experience, DevSecOps
- Have AWS Cloud One or AWS Gov Cloud experience
