

Team Triton to share an internship opportunity that may be a great fit for Faulkner University students interested in gaining hands-on experience this summer. We are currently looking to bring on 1–3 interns to assist across several areas of our business, including graphic design, social media management, marketing, business operations, and sports management. This role is designed to give students real-world exposure to a fast-paced, team-oriented environment where they can contribute to meaningful projects and develop practical skills. Interns would have the opportunity to:

- Assist with social media content creation and scheduling
- Support graphic design projects for apparel and branding
- Participate in marketing campaigns and promotions
- Gain insight into business operations and client relations
- Work within the sports apparel and team sales space

We are looking for motivated, reliable students who are eager to learn and contribute. This is a great opportunity for those wanting to build their portfolio and gain applicable experience in their field of interest.

If you know of students who may be a good fit, we would greatly appreciate you sharing this opportunity with them. I'm happy to provide additional details or discuss how we can best connect with interested candidates. This would be an in-office opportunity at our storefront location in Downtown Montgomery.
