

"Kinesis" is a word of Greek origin that in simplest terms means "to move". Our goal at Kinesis Business Solutions is to move your business forward through assistance with financial, structural and organizational procedures. We are team players – working to understand and promote the objectives unique to your company. After nearly 20 years helping hundreds of clients both large and small, we've learned one very important lesson: accounting may be boring ... but we're not. We still enjoy what we do and it shows in our relationships with our clients.

#### **Move Your Business Forward**

Just imagine how aggressively your business might grow if you could just focus on what you do best. Chances are, you're not at your best struggling with paperwork and procedures. That's what we do. And when we do what we do best, you'll get the best out of your team and the most out of their potential.

Don't be that guy.

#### **Sourcing Assistance**

The Kinesis team partners with financial institutions, financial planners, attorneys and CPAs to bring strength to the top tier of your business. These professionals are at your service as needed, keeping your expenses down and your bottom line moving forward. We are also available to work with your established management team to fill in where needed until you are ready to add to your in-house personnel.

#### **Chew on this a while.**

In 2018, businesses paid the IRS over \$3,000,000 in civil penalties.

#### **It just doesn't add up.**

What takes you an hour or more, we'll get done in 30 minutes. In terms of human resources, it's a no-brainer.
